Creating Our Flask Application And Loading Our Model By Using Load model Method

TEAM ID   : PNT2022TMID10679

PROJECT NAME   : AI-Powered Nutrition Analyzer for fitness

enthusiasts

Creating our flask application and loading our model by using the load_model method

```
app = Flask(__name__,template_folder="templates")
model=load_model('C:\\Users\\ELCOT\\Desktop\\Nutrition\\nutrition.h5')
print("Loaded model from disk")
```
